JOSEPH A. JACHIMCZYK, M.D., J.D. FORENSIC PATHOLOGIST ATTORNEY AT LAW CHIEF MEDICAL EXAMINER

228-8311 Ext. 671 (Day) Ext. 212 (Night)

# OFFICE OF THE MEDICAL EXAMINER OF HARRIS COUNTY

HARRIS COUNTY COURT HOUSE HOUSTON, TEXAS 77002

### AUTOPSY REPORT

Case 73 - 3365

### August 14, 1973

### PATHOLOGICAL DIAGNOSIS ON THE BODY

OF

## Jeffrey Allen Konen 3118 Underwood Street Houston, Texas

Asphyxia due to strangulation and gagging.

#### OPINION

It is our opinion that the decedent, Jeffrey Allen Konen, came to his death as a result of asphyxia due to strangulation and gagging - Homicide.

It is our further opinion that the time of death was on or about September, 1970.

Joseph A. Jachimczyk, M.D., J.D. (). Chief Medical Examiner

(See Companion Cases 73-3366, 73-3408, 73-3409, 73-3412 and 73-3413)

### POSTMORTEM EXAMINATION ON THE BODY OF

### Jeffrey Allen Konen 3118 Underwood Street Houston, Texas

HISTORY: These skeletal remains were recovered in a shallow grave on the beach at High Island, Texas, at 3:15 p.m. on August 10, 1973. The remains were brought to the Harris County Morgue, Houston, Texas, together with 73-3366, Unknown #19, at 6:10 p.m. on August 10, 1973. (See Companion Cases 73-3366, 73-3408, 73-3409, 73-3412 and 73-3413)

AUTOPSY: The autopsy was performed by Chief Medical Examiner Joseph A. Jachimczyk, M.D., assisted by Assistant Medical Examiners G. Sheldon Green, M.D., and Ethel E. Erickson, M.D., and Dr. Paul G. Stimson, beginning at 2:30 p.m. on August 14, 1973, in the Harris County Morgue.

EXTERNAL APPEARANCE: The skeletal remains were wrapped in plastic drop cloth-type material and weighed a total of 50 pounds. There was a skull with varying amounts of brown hair, measuring up to 6-1/2 inches in length at the crown. Around each of the wrist areas and leg areas, there was three strand nylon cord similar to that seen in the other cases. There was a strip of white adhesive tape as a gag. There was a short strand of string knotted in a Y-shape. There was a small irregular piece of cardboard on which was written the legend "FOUND AT SCENE #1" and signed "WESLEY KING". The cardboard strip measured 5-1/8 inches in length. Both feet were present. They measured 8-1/2 inches in length from toe to heel. The soft tissue was still adherent, but cheesy. The skull and mandible were both present. There were no clothes present in this crashbag. Except for the soft tissues still recognizable on each of the two feet, better preserved on the right, there was no soft tissue. There were still some tiny bits of soft tissue adherent along the long bones at the site of insertions of the muscles. The bones included twenty-four ribs, twenty-three vertebrae, the sacrum and the coccyx in one segment; the long bones included two femurs, two tibiae, two fibulae, two humeri, two radii and two ulnae. There were two clavicles, two scapulae, two pelvic bones, two patellae, the body of the sternum and the manubrium in two pieces. The distal epiphysis of one of the radii was separate. There were eight small bones of the wrist. There also were ten metacarpals and fifteen small bones of the fingers. The feet were preserved in formalin in a separate package.

Postmortem X-rays did not reveal any radiopaque objects.

#### Jeffrey Allen Konen

Case 73 - 3365

#### DENTAL EXAMINATION

Utilizing the Universal System, all four third molars are extracted. There was an occlusal amalgam in the upper right second molar, number 2; a distal and mesial pit amalgam in the upper right first molar, tooth 3; an upper right second bicuspid has been extracted, number 4; the upper left second bicuspid, number 13, has been extracted; the upper left first molar, tooth 14, has an occlusal and a distal lingual amalgam; the upper left second molar, number 15, has an occlusal and a distal pit amalgam; the lower left second molar, number 18, has an occlusal amalgam; the lower left first molar has an occlusal amalgam and a buccal pit amalgam, tooth 19; the lower left second bicuspid, number 20, has been extracted; the lower right second bicuspid, number 29, has been extracted; the lower right first molar has an occlusal amalgam and a buccal pit amalgam, number 30; and the lower right second molar has an occlusal amalgam, number 31. The teeth were in good alignment with no open contacts. Evidence was present on the buccal surface of the molars, especially, where there had been placement of orthodontic bands due to a slight line of decalcification. The jaw relationships were normal. There were buccal caries in tooth 15 and tooth 30. A comparison was made of the radiographs, antemortem and postmortem. The antemortem radiographs belonged to Dr. W. J. Schoverling, 3931 Essex Lane, Houston, Texas, 77027, and were presented to Chief Medical Examiner Joseph A. Jachimczyk, M.D., by Federal Bureau of Investigation Agent Randall J. Farmer on October 10, 1973. The outline of the antemortem and postmortem radiographs of the fillings were exactly identical. The decedent was identified as Jeffrey Allen Konen.

Paul G. Stimson, D.D.S., M.S.

ESTABLISHED 1905

September 18, 1973

Mr. Harry J. Konen 3118 Underwood Houston, Texas 77025

Dear Mr. Konen:

Please be advised that the Harris County Medical Examiner and H. B. Garrett, Registrar for the City of Houston Health Department, have requested the return of the two death certificates that you received on your son Jeffrey Allen Konen.

Therefore, we enclose a self-addressed envelope for your convenience in returning the death certificates to us. New death certificates will be issued and we will send them to you as soon as possible. Thank you for your cooperation.

Yours very truly,

EARTHMAN FUNERALS

That L. Varekonen

Robert L. Earthman President
